

Many of the changes to the specification were necessitated by the fact that the specification as originally filed used the terms "block", "band", and "range" inconsistently throughout the specification and the claims. No new matter has been added.

The applicants respectfully request that the Examiner approve the changes indicated in red on Figs. 1, 3, 5, 9, 10, and 14. These changes have been made to conform the terms used in the drawings to those used in the substitute specification.

Claims 1 through 58 are active in the application. The applicant has added new claims 8 through 58.

The applicants have amended claims 1 through 7 to more particularly point out and distinctly claim the subject matter that the applicant regard as the invention, and also to conform these claims more closely with normal United States claiming practice. Claims 1 through 7, as amended, are similar, but not identical, to claims 1 through 7 of the prior application. Claims 25 through 31 are similar, but not identical, to claims 8 through 14 of the prior application, and claims 51 through 53 are similar, but not identical, to claims 15 through 17 of the prior application.

Claims 8 through 24, 32 through 50, and 54 through 58 are new claims to this application.

For the Examiner's convenience, a complete set of claims, amended as set forth above, is included in the substitute specification.

Respectfully submitted,

LIMBACH & LIMBACH
